

For 1 month (April - May 2015) students from Estonia and Italy will be recording on a video camera their typical Sunday lunch. They will need to describe the ingredients and tell if it's healthy or not with reasons. Then they publish the videos in TwinSpace where everyone can see it and leave comments with questions. Finally, people will vote on the best-interesting-creative video by the students.

- **Subjects:** Cross Curricular, Foreign Languages, Health Studies, Informatics / ICT
- **Languages:** EN
- **Pupil's age:** 15 - 18
- **Tools to be used:** e-mail, Forum, Other software (Powerpoint, video, pictures and drawings), Twinspace, Virtual learning environment (communities, virtual classes, ...), Web publishing
- **Aims:** To develop -students' healthy eating habits; -communicative language skills (English); -intercultural competence (Estonia - Italy); -digital competence (video, Internet); -students' creativity.
- **Work process:** The teacher finds a partner; -The partners agree on the deadline and the outline of the project; -The partner participants introduce themselves in a virtual environment Twin Space; -Students record their typical Sunday lunch on a video camera and analyse whether it's healthy or not; -The partner teachers or the students themselves upload students' videos to Twin Space; -All the participants watch all the videos, give feedback, ask questions and communicate with different students, vote in MENTIMETER on the most creative video out of all; -Best 3 videos from 3 students from each country (6 altogether) will be awarded with certificates.
- **Expected results:** Students from Estonia and Italy get to know each other; - Students practise the language skills and develop communicative competence mostly; - Students know how to use video editing programmes; - Students know how to use Twin Space; - Students know about healthy/unhealthy food habits; - Students develop intercultural competence.
